

Wake Up

by Sarah Elizabeth Foster

It's daylight and I didn't even realize cause my curtains never open to the sun
It's daylight but it's dark inside these walls and I never have to leave when there's food
delivery

It's daylight and the people go outside and they do the things they do while I'm stuck
inside this room

It's daylight and I didn't even realize cause my curtains never open to the sun
It's daylight but it's dark inside these walls and I never have to leave when there's food
delivery

It's daylight and the people go outside and they do the things they do while I'm stuck
inside this room

Wake up little girl

Stop covering your eyes

There's a life for you to live

And a family who loves you and some friends who want to see you smile

It's nighttime the time that I should sleep, but I'm longing for the day I left behind

It's nighttime, but it's light inside these walls and the TV shows the happiness I want

It's nighttime and I'm sad because I'm tired, but it might be that I'm tired cause I'm sad

Wake up little girl

Stop covering your eyes

There's a life for you to live

And a family who loves you and some friends who want to see you smile

Give them what they want little girl, don't be so afraid

It's just one bad day little girl

It's just one bad day

Wake up, wake up, wake up please oh please

Wake up, wake up, wake up please

Won't you wake up

Won't you wake up

Wake up little girl

Stop covering your eyes

There's a life for you to live

And a family who loves you and some friends who want to see you smile

Give them what they want little girl, don't be so afraid

It's just one bad day little girl

It's just one bad day

Gardening from the Ground Up

by Sarah Elizabeth Foster

Lately I've found I can't be unwound
I love him and he loves me
Somewhere it seems I gave up my dreams to love him now where is me?

I'm gardening from the ground up, but I can't pull this weed
I'm gardening from the ground up, but I can't pull this weed

It will come back, it will come back
I can't just move, I can't just move
It will come back, never again
It will come back, never again
It will come back, never again, never again, never again

I'm gardening from the ground up, but I can't pull this weed
I'm gardening from the ground up, but I can't pull this weed

Lately I've found I can't be unwound
I love him and he loves me
Somewhere it seems I gave up my dreams to love him now where is me?

I'm gardening from the ground up, but I can't pull this weed
I'm gardening from the ground up, but I can't pull this weed

It will come back, it will come back
I can't just move, I can't just move
It will come back, never again
It will come back, never again
It will come back, never again, never again, never again

I'm gardening from the ground up, but I can't pull this weed
I'm gardening from the ground up, but I can't pull this weed

It will come back, it will come back
I can't just move, I can't just move
It will come back, never again
It will come back, never again
It will come back, never again, never again, never again

I'm gardening from the ground up, but I can't pull this weed
I'm gardening from the ground up, but I can't pull this weed

It will come back
He will come back

Missing You Now

by Sarah Elizabeth Foster

Writing in the daylight brings me shining words
Laughing like the first time brings to life these chords

And I want to sing you this song cause I love you
And I want to read you my words cause they're for you
And you are the one that I dream, I dream of
And I know I'll be with you somehow, but I'm missing you now

Late at night alone I sing as though you're here
Imagining that somewhere you can hear me dear

And I want to sing you this song cause I love you
And I want to read you my words cause they're for you
And you are the one that I dream, I dream of
And I know I'll be with you somehow, but I'm missing you now

Cause you are the one that I wake up and I look for
And I think of you and I could just die happy

Instrumental

And I want to sing you this song cause I love you
And I want to read you my words cause they're for you
And you are the one that I dream, I dream of

I know I'll be with you somehow; I'll be with you somehow
But I'm missing you; I'm missing you now

Be My Friend Always

by Sarah Elizabeth Foster

Intro

Ooo, ooo

Ooo, ooo

There are planks of wood holding up this house
And there are stones that pave your way
Won't you visit me?
Won't you step inside?

I've made some tea it's your favorite kind
And I have all the time
Won't you be with me?
Won't you take my side?

Wash me like a baby
Touch me softly till I sleep
Whisper everything you love about me
Oh be my friend
Oh be my friend always

Ooo, ooo

Ooo, ooo

There are planks of wood holding up this house
And there are stones that pave your way
Won't you visit me?
Won't you step inside?

I've made some tea it's your favorite kind
I have all the time
Won't you laugh with me?
Won't you stay awhile?

Wash me like a baby
Touch me softly till I sleep
Whisper everything you love about me
Oh be my friend
Oh be my friend always
Oh be my friend always

Oh wash me like a baby
Touch me softly till I sleep
Whisper everything you love about me
Oh be my friend
Oh be my friend always
Oh be my friend always
Oh be my friend...always

Let's Go Away

by Sarah Elizabeth Foster

Come with me and you'll see what I want to do
Come with me and you'll see what I'd love to do

Let's go away
Let's go away
Let's take a ride anywhere, let's go
Let's leave everything, everything behind
Let's go away
Let's go away

Come with me and you'll see what I want to do
Don't be shy, hold my hand and I'll smile for you

Let's go away
Let's go away
Let's take a ride anywhere, let's go
Let's leave everything, everything behind
Let's go away
Let's go away

We'll go away for good, we won't tell anyone
Together, together we'll go
We'll go away for good, we won't tell anyone
Together, together we'll go

Let's go away
Let's go away
Let's take a ride anywhere, let's go
Let's leave everything, everything behind
Let's go away
Let's go away
